Cabell Huntington Hospital Recognized as a Robotic Surgery Center of Excellence

The Institute for Minimally Invasive Surgery at Cabell Huntington Hospital (CHH) has been named a Center of Excellence in Robotic Surgery (COERS) by the Clinical Robotic Surgery Association and Surgical Review Corporation. CHH is the only hospital in West Virginia to receive this accreditation.

“As the first to bring *da Vinci*® to the region in 2006, Cabell Huntington Hospital continues to lead the region in robotic surgery,” said Kevin N. Fowler, president and CEO, CHH. “Earning SRC’s accreditation signifies our ability to consistently deliver the safest, highest-quality care to our patients. The Center of Excellence supports our team’s commitment to quality improvement processes and exceeds clinical benchmarks and guidelines. Most importantly, our commitment to excellence improves the health and well-being of our patients. It is an honor to be the only hospital in the state to receive this designation of excellence.”

The COERS program was developed to recognize facilities and surgeons worldwide, who are performing robotic procedures and achieving defined standards for patient safety and care quality. The CHH team met rigorous requirements including demonstrating institutional commitment to excellence, surgical experience, patient education and a focus on continuous quality improvement.

For more information about Cabell Huntington Hospital's Institute for Minimally Invasive Surgery visit <http://cabellhuntington.org/services/minimally-invasive-surgery/> or call 304.781.IMIS (4647).

NEW Programs & Services

Young Women's Health and Hematology Clinic

Marshall Obstetrics & Gynecology and Cabell Huntington Hospital offer a monthly Young Women's Health and Hematology Clinic on the second Thursday of each month.

The clinic is exclusively for young women ages 10 to 24 who experience menorrhagia and abnormal vaginal bleeding, and specializes in the diagnosis and treatment of abnormal vaginal bleeding and patient education, including the need for specialized health care in the future, especially during surgery, trauma or childbirth.

Patients have one-stop access during their doctor visit to lab work, ultrasounds and other radiology services, as needed.

Physician referrals can be made through the Marshall Health Physician Referral Line by calling 304.691.5333.

Chest Pain Observation Unit

To provide specialized diagnostic care for patients presenting with symptoms of a heart attack, Cabell Huntington Hospital has opened a new 9-bed dedicated Chest Pain Observation Unit.

The new unit is located on the third floor of CHH and is fully staffed with a central telemetry station where cardiac data such as heart rate and rhythm are collected. The unit also works closely with EKG, ECHO and Cardiac Rehab to provide a more comprehensive assessment of patients.

The additional beds will allow the use of evidence-based protocols for chest pain evaluation and treatment. The new unit will deliver care for patients with coronary artery disease while expediting the outpatient observation work-up and release of lower-risk patients with non-cardiac chest pain.

For more information please call 304.399.1545.

Maternal Opioids Medication Support Program

MOMS Program

The Hoops Family Children's Hospital at Cabell Huntington

Hospital has created a program that begins once a mother gives birth and provides comprehensive addiction treatment services that promote bonding between mother and baby.

The MOMS (Maternal Opioid Medication Support) program was developed to provide addiction treatment services to

postpartum women, not currently in a treatment program, while their babies are recovering from neonatal abstinence syndrome (a group of problems that occur in newborns exposed to addictive drugs) in the Neonatal Therapy Unit (NTU).

The goal is to provide medication stabilization, psychological and medical treatment, education and training that will create a solid foundation for a healthy, productive life-style that will benefit the mother as well as the family network. This education includes a team of experts who address the specific needs of mothers and offers a range of services from counseling to occupational rehabilitation with a goal to end the cycle of addiction.

Senior Pain & Wellness Center

Marshall Health's new Senior Pain and Wellness Center utilizes the most advanced medical and interventional pain management techniques to diagnose and treat pain conditions in adults 55 and older.

The center emphasizes preventive medicine and focuses on restoring function in senior adults coping with conditions such as chronic back pain, arthritis pain, degenerative disc disease, degenerative joint disease and sciatica. A variety of treatment options are available at the center, including epidural steroid injections, facet nerve blocks, radiofrequency ablation, joint injections, trigger point injections, spinal cord stimulation and more.

The Center is lead by Joseph DeLapa, MD, a fellowship-trained, double board certified interventional pain management physician and anesthesiologist. He has practiced pain management at Cabell Huntington Hospital's Pain Management Center since 2013 and served as president/CEO of the Interventional Pain and Spine Center at Bellefonte, PSC in Ashland, Kentucky, from 2009-2013.

The Marshall Senior Pain and Wellness Center, an outpatient department of Cabell Huntington Hospital, is located in the 20th Street Professional Building at 1115 20th Street in Huntington.

To schedule an appointment for your senior patients, please call 304.691. 6779.

Long-time physicians, Gerard Oakley, MD and Linda Brown, MD retire from Cabell Huntington Hospital

Gerard J. Oakley, MD, gynecologic oncologist, longtime cancer specialist and Chief of the Division of Gynecologic Oncology at Marshall University Joan C. Edwards School of Medicine, retired from the school, Marshall Health and the Medical and Dental Staff at Cabell Huntington Hospital (CHH) in January.

of the Division of Gynecologic Oncology in the Department of Obstetrics and Gynecology at Marshall University Joan C. Edwards School of Medicine; Chair of the Oncology Committee at Cabell Huntington Hospital and President of the Medical Staff at Cabell Huntington Hospital. He also led the development of the Institute for Minimally Invasive Surgery and was instrumental in the Robotic Surgery Center of Excellence designation.

For more than 10 years, Dr. Oakley served in the department of obstetrics and gynecology at the school of medicine, currently led by David C. Jude, M.D.

Dr. Oakley came to Huntington in 1997 as a faculty member at the school of medicine and is a founding physician of the Edwards Comprehensive Cancer Center (ECCC). He is the first Executive Director of Perioperative Services at CHH and has directed clinical operations that include programs for surgical oncology, pediatric oncology, medical oncology and hematology and radiation oncology for the diagnosis and treatment of various types of cancer.

Dr. Oakley earned his medical degree at the University of Michigan and completed his fellowship training in gynecologic oncology at the University of Minnesota. He is certified by the American Board of Obstetrics and Gynecology and is a fellow of the American College of Obstetricians and Gynecologists.

He is also a veteran of the United States Military serving in the U.S. Air Force from 1979 to 1997 and continuing with the West Virginia National Guard from 1998 to 2004. He is a retired Lieutenant Colonel.

During his career, Dr. Oakley held numerous hospital and academic leadership positions including Professor and Chief

Linda Brown, MD, pathologist at Cabell Huntington Hospital and professor and chair of the Department of Pathology at the Marshall University Joan C. Edwards School of Medicine, retired after over 30 years of service.

Administration Medical Center and retired from University Physicians and Surgeons, Inc., in January.

During her career, Dr. Brown held numerous hospital and academic leadership positions including Chair of the Credentials Committee and President of the Medical and Dental Staff. She also served as the Chief of Pathology and was named Chief Resident in the Department of Pathology at Marshall University Joan C. Edwards School of Medicine. She received her medical degree and completed her residency and a fellowship in Pathology at the Marshall University Joan C. Edwards School of Medicine. She was board certified in pathology by the American Board of Pathology.

Huntington Hospital in 1972. She held positions at St. Mary's Medical Center, Pathology Services Group, Inc., the Veteran's

Dr. Oakley and Dr. Brown were honored with an endowed scholarship in their names for medical students at Marshall's School of Medicine, courtesy of donations by Cabell Huntington Hospital and Marshall Health. For more information or to make a gift to the school of medicine, please contact Linda L. Holmes, director of Development and Alumni Affairs at 304.691.1711.

Jenson Named Interim Medical Director of ECCC

James Jensen, MD, board-certified urologic oncologist, will serve as Interim Medical Director of the Edwards Comprehensive Cancer Center (ECCC) at Cabell Huntington Hospital. This follows Dr. Gerard Oakley's retirement.

In this position, Dr. Jensen will oversee the medical leadership structure and clinical operations of the ECCC while a national search is conducted for the position. He is a professor in the Department of Surgery at the Marshall University Joan C. Edwards School of Medicine.

"Dr. Jensen has been a leader and contributed to many ECCC milestones, including the center's growth and reputation as a regional destination for cancer care," said Kevin Fowler, president and CEO of Cabell Huntington Hospital. "I am pleased Dr. Jensen will lead this transition and feel confident he will provide excellent leadership."

Dr. Jensen is world-renowned in robotic, urologic surgery with nearly 10,000 hours of experience using the *da Vinci® Surgical System*. He has performed nearly 1,500 robotic kidney, bladder and prostate cancer procedures and was among the first 20 physicians in the nation to adopt robotic surgery as a full-time practice.

Dr. Jensen joined the Medical and Dental Staff at Cabell Huntington Hospital in 2007. He received his medical degree from the Pritzker School of Medicine in Chicago, IL, and completed his residency in urology and oncology at the University of California Medical Center in Los Angeles, CA.

Bou Zgheib to Serve as Chair of the Robotics Committee

Nadim Bou Zgheib, MD, a board-certified and fellowship-trained gynecologic oncologist, has been appointed Chair of the Cabell Huntington Hospital Robotics Committee. He replaces recently retired Chair Gerard Oakley, MD.

Dr. Bou Zgheib, an assistant professor in the Department of Obstetrics and Gynecology at Marshall University Joan C. Edwards School of Medicine, has been a member of the Medical and Dental Staff at Cabell Huntington Hospital since 2014. He is certified by the American Board of Obstetrics and Gynecology and has completed extensive training in gynecologic cancer diagnosis and treatment and minimally invasive surgery, including *da Vinci®* surgery.

Dr. Bou Zgheib completed fellowship training in clinical and research gynecologic oncology at the Moffitt Cancer Center at the University of South Florida. Additionally, he underwent advanced surgical training for gynecologic malignancies and special pelvic procedures at the Center for Advanced Medical Learning and Simulation in Tampa, FL.

Assaley Appointed Executive Medical Director of Perioperative Services at Cabell Huntington Hospital

Joseph P. Assaley, MD, FACOG, obstetrician and gynecologist at Cabell Huntington Hospital's (CHH) Huntington Women's Health has been appointed Executive Medical Director of Perioperative Services at CHH.

In this role, Dr. Assaley will oversee the development of the overall leadership structure, business plan, quality and plans for growth for surgical services which includes Anesthesia, Endoscopy, the CHH Surgery Center, PAT, Pre-Operative Services, Operating Room, PACU, and Central Sterile Processing.

Dr. Assaley received his medical degree from Marshall University Joan C. Edwards School of Medicine and completed his residency in obstetrics and gynecology at Chicago Lying-In, University of Chicago. He is board certified by the American Board of Obstetrics and Gynecology. He joined the Medical and Dental Staff at Cabell Huntington Hospital in 1992 and also holds a master's degree in Community Health Education from West Virginia University.

"We are excited that Dr. Assaley has agreed to provide his knowledge and talents in this role," said Kevin Fowler, president and CEO of Cabell Huntington Hospital. "His expertise and leadership will continue the excellent care and service in Perioperative Services."

#CHHCare

Trauma Kits for Local Law Enforcement

Cabell Huntington Hospital (CHH) donated 48 trauma kits to the Cabell County Sheriff's Department to help officers control potentially life-threatening bleeding as a result of various types of medical events they may encounter.

Extensive education and training also have been provided by the hospital to ensure proper use.

The trauma kits contain:

- Quick clot pads – used to rapidly stop severe bleeding
- A tourniquet
- A gauze pack
- A pressure bandage
- Medical gloves

Needle-Resistant Gloves for First Responders

Cabell Huntington Hospital donated \$11,856 to the Cabell County Emergency Medical Technicians, the Cabell County Sheriff's Office and the Huntington Police Department to purchase needle-resistant gloves. The donation allows for the purchase of up to 103 gloves that protect first responders who often deal with overdoses and find syringes while trying to provide care.

CHH Joins Open To All Campaign

Cabell Huntington Hospital joined Marshall University, city leaders and area businesses in a pledge of commitment to promote diversity, equality and inclusion. Open to All is a nationwide campaign to help protect nondiscrimination laws. These laws ensure that when businesses open their doors to the public, they serve everyone on the same terms regardless of race, religion, ancestry, sex, age, disability, sexual orientation or gender identity.

A.D. Lewis Center Receives Endowment

Cabell Huntington Hospital presented the A.D. Lewis Community Center with a \$1 million endowment. The donation was the result of CHH's involvement with the Fairfield Alliance, which consists of more than 40 members from local, state and federal organizations, working together for the betterment of the Fairfield community. The funding will be used in partnership with Marshall University to provide enrichment activities through students who will serve as mentors, coaches and tutors for the children at the center.

S in the Community

CHH Supports Dress for Success

Cabell Huntington Hospital also presented a \$5,000 check to further the Dress For Success "Best Foot Forward" initiative. The nonprofit serves women in 152 cities in 28 countries on their journey to economic independence. Over the last

10 years, Dress for Success River Cities has provided in excess of 2,500 women with the professional attire and resources to succeed in work and in life.

CHH donates to STEM+M Academy's Program

Cabell Huntington Hospital presented a donation of more than \$35,000 to the Tri-State STEM+M Academy to support *Project Lead the Way*, a national program designed to teach high school students the process of defining and solving problems

without focusing on getting the right answer. The program is a national initiative to provide youth with the skills needed for critical thinking and problem solving.

Your Partners for Life.

Cabell Huntington Hospital Awards and Designations

**MISSION:
LIFELINE**

AHA Mission Lifeline

Cabell Huntington Hospital (CHH) has received the American Heart Association's Mission: Lifeline® Heart Attack Receiving Center Accreditation.

The accreditation program — sponsored by the American Heart Association and the Society of Cardiovascular Patient Care — recognizes centers that meet or exceed quality of care measures for people experiencing the most severe type of heart attack, ST-elevation myocardial infarction (STEMI), in which blood flow is completely blocked to a portion of the heart.

RAISE Stroke Award

The National Stroke Association presented Mitzi Beckett, BSN, SCRN, stroke program coordinator at Cabell Huntington Hospital with the Raising Awareness in Stroke Excellence (RAISE) Award for creativity. She was one of only eight recipients in the United States to receive this prestigious honor.

Beckett, who provides stroke education throughout the region, received the award for the creation of *FASTman*, a superhero character used to help educate children about stroke.

FASTman was created to bring fun and excitement to the learning process. He was developed out of the acronym FAST (Face drooping, Arm immobility, Slurred speech and Time to call 911) used to educate what to look for and how to react to an individual suffering from a stroke.

Neurophysiology Lab Accreditation

The Neurophysiology Lab at Cabell Huntington Hospital (CHH) has received Laboratory Accreditation status from the American Association of Neuromuscular & Electrodiagnostic Medicine

(AANEM). The Neurophysiology Lab analyzes and monitors nervous system function to promote the effective treatment of neurological diseases and conditions. CHH is one of only two neurophysiology labs in the state of West Virginia to receive this designation.

Blue Distinction

Cabell Huntington Hospital (CHH) has been recognized by Highmark Blue Cross Blue Shield West Virginia with a Blue Distinction® Center for Maternity Care designation (since 2014) and a Blue Distinction® Center for Bariatric Surgery designation (since 2015) as part of the Blue Distinction Specialty Care program.

Blue Distinction Centers are nationally designated hospitals that show expertise in delivering improved patient safety and better health outcomes, based on objective measures that were developed with input from the medical community.

Certified Quality Breast

Cabell Huntington Hospital's Breast Health Center and the Edwards Comprehensive Diagnostic Breast Center have received the National Quality Measures for Breast Centers (NQMBC) Certified Quality Breast Center designation. The Breast Health Center has earned this honor for seven consecutive years. No other hospital in the state or region has earned this recognition.

The NQMBC program offers breast health centers the ability to track and measure quality performance measures in more than 30 individual quality indicators. Measuring and comparing quality performance are effective in assessing patient care and identifying ways to improve.

Orthopaedic Spine Surgeon Brings 20 Years of Experience

Tom E. Reinsel, MD, a board-certified, fellowship-trained orthopaedic spine surgeon, and associate professor in the department of orthopaedic surgery at the Joan C. Edwards School of Medicine, specializes in minimally invasive spine surgery and all areas of spinal care and surgery, including spinal cord injuries, scoliosis, lumbar and cervical disc conditions, and back and neck pain.

An orthopaedic spine surgeon with more than 20 years of experience, Reinsel has practiced at The Ohio State University; Kaiser Permanente/The Cleveland Clinic Foundation; the University of Missouri and most recently in Kansas City, MO. He has held academic appointments at The Ohio State University and the University of Missouri.

Reinsel received his medical degree from Washington University in St. Louis, MO. He completed orthopaedic residencies at Cook County Hospital and Northwestern Memorial Hospital, both in Chicago, IL, and dual spine fellowships at Rush Medical Center in Chicago, IL, and the University of Vermont in Burlington, VT. He is certified by the American Board of Orthopaedic Surgery.

Reinsel is accepting referrals at Marshall Orthopaedics at the Marshall University Medical Center, an outpatient department of Cabell Huntington Hospital. To make a referral call 304.691.1262 in Huntington or 304.691.6710 in Teays Valley.

HomeCare Medicine

Travel Doctors has partnered with Cabell Huntington Hospital (CHH) and is now CHH Home Care Medicine and provides pre and post-acute care for homebound patients ages 18 and older. The skilled and highly trained physicians and nurse practitioners provide the same services received in a physician's office within the comfort of the patient's home.

CHH Home Care Medicine offers:

- physical examinations
- disease management
- medication management
- coordination of lab and X-ray services in the home
- coordination of care (hospice, home health and hospitalization)

Patients who qualify for services must be at least 18 years of age or older and considered frail or homebound.

For more information please call 304.529.7004 Monday through Friday from 8 a.m. to 4:30 p.m.

Cabell Huntington Hospital becomes first hospital in West Virginia to adopt sepsis prediction machine learning algorithm

Cabell Huntington Hospital (CHH), is the first hospital in West Virginia to adopt InSight, a machine learning algorithm for sepsis prediction.

Developed by Dascena, Inc., *InSight* analyzes routinely collected data in the electronic health record to forecast sepsis and provide nurses and physicians with several hours of lead time for sepsis treatment. In a recent randomized clinical trial, mortality decreased by 12.4 percentage points with InSight, a relative reduction of 58%. CHH has reduced its sepsis-related in-hospital mortality by 33.5% and its sepsis-related hospital length of stay by 17.1%.

"Because the early clinical diagnosis of sepsis can be challenging and time is so critical, we turned to InSight to assist nurses and physicians with an earlier electronic alerting system. We are already seeing a positive impact for our patients through improved rates of survival," stated Hoyt J. Burdick, MD, senior vice president and chief medical officer.

"We can now be one step ahead in diagnosing and treating sepsis, where hours and minutes can mean the difference between life and death," added Eduardo Pino, MD, Medical Director of the Hoops Family Children's Hospital at CHH.

"Cabell Huntington Hospital has a strong reputation of delivering exceptional quality patient care," said Ritankar Das, chief executive officer of Dascena. "We are excited to work with them on combating sepsis, a life-threatening condition that kills an American nearly every two minutes."

Dascena, Inc. is a science and technology company developing algorithms as predictive biomarkers for complex conditions in inpatient and emergency settings. Our NIH-funded machine learning and clinical research has led to our suite of AlgoDiagnostics™ for predicting acute decompensation, sepsis and acute kidney injury, resulting in several peer-reviewed publications. Providers across the country use our AlgoDiagnostics on tens of thousands of patients per year to make early, accurate, and often life-saving interventions.

Cabell Huntington Hospital Announces expansion of lab services to include toxicology

Cabell Huntington Hospital is expanding lab services to include toxicology for drug screenings, confirmations and secondary analysis using different technology to identify specific drugs, their levels as well as other more minute aspects of the initial drug screening. This is significant not only in providing more timely and precise results, but also allows this important service be provided in West Virginia.

Currently, all drug testing confirmation in West Virginia is outsourced to vendors in a number of states; officials estimate that approximately \$120-\$140 million in health care costs is exported. With the addition of the new laboratory, those health care dollars will stay in the state.

The new toxicology lab, developed in collaboration with Marshall University's nationally recognized Forensics Science Graduate Program will assist tremendously in the region's response to the opioid epidemic by offering a full range of toxicology lab services.

"As a national leader who is addressing the opioid epidemic, we will be able to quickly confirm the presence and level of

substances," said Kevin N. Fowler, president and CEO, Cabell Huntington Hospital. "As a commitment to this important service, we are expanding the lab staff to include toxicology and technicians specifically trained to use highly complex instrumentation which translates to better, more coordinated and timely testing."

James B. Becker, MD, vice dean for government relations, health care policy & external affairs at the Marshall University Joan C. Edwards School of Medicine and a family medicine physician, said the new laboratory will be very beneficial to physicians, law enforcement and others.

"While we have long provided prompt screening, the addition of this service will dramatically improve the information available to clinicians and reduce the turn-around time on the testing," Becker said. "The service will also support the regional needs of our providers of medication assisted treatment. State-of-the-art technology will enable providers to identify drugs of abuse and also monitor compliance with treatment regimens."

MHC ACO to participate in Medicare Shared Savings Program

Innovative partnership using a quality-driven approach is designed to deliver the right care, in the right place, at the right time

More than 13,500 Tri-State Medicare beneficiaries will benefit from an innovative, highly coordinated, quality-driven approach to care as the MHC Accountable Care Organization began participation in January 2018 in the Medicare Shared Savings Program (MSSP).

Launched by Medicare to advance the Affordable Care Act, the MSSP facilitates coordination and cooperation among providers both to improve the quality of care for Medicare beneficiaries and to reduce unnecessary costs. Its three-part aim is to promote:

- Better care for individuals;
- Better health for the population served; and
- Containment of the growth in health care costs.

In an innovative regional partnership, Marshall Health, Huntington Internal Medicine Group and Cabell Huntington Hospital, Inc., have joined to create MHC Accountable Care Organization, LLC (MHC ACO) to participate in MSSP. As part of the MSSP, MHC ACO, along with Marshall Health, Huntington Internal Medicine Group and Cabell Huntington Hospital will work with other health care providers to ensure that traditional Medicare patients in the Tri-State region attributed to MHC ACO receive the right care, in the right place, at the right time.

“With the number of Medicare patients across the region only continuing to grow, this partnership represents the major health care providers in our region coming together to best care for this vulnerable population,” said Joseph I. Shapiro, M.D., dean of the Marshall University Joan C. Edwards School of Medicine and board chair for its faculty practice plan, Marshall Health. “This initiative is as much about improving and coordinating care as it is a cost-containment measure for the care of our seniors.”

“HIMG is pleased to partner with Marshall Health and Cabell Huntington Hospital to jointly collaborate on MHC for the benefit of traditional Medicare beneficiaries within the region,” stated Mark Morgan, CEO, Huntington Internal Medicine Group. “We are excited about this partnership for our physicians, staff and ultimately each of those participants in the ACO. We believe this is a watershed moment within the community as these respective strong organizations work jointly, to improve the health and wellness of our community.”

“We are thrilled to partner with Marshall Health and HIMG in this innovative program that places patients at the center of their care,” said Kevin N. Fowler, president & CEO, Cabell Huntington Hospital. “MHC ACO is about leveraging the benefits and capabilities of information technology to proactively coordinate high-quality care for Medicare beneficiaries,

especially those who are managing multiple or severe chronic conditions. Through this partnership, we will strive to enhance access and smooth transitions throughout the care continuum to improve patient outcomes and the patient experience.”

This more integrated, quality-driven approach means patient needs are at the forefront of our care approach. It assures a pro-active relationship among patient and providers and offers assistance in navigating care across settings.

The Medicare Shared Savings Program rewards ACOs that improve outcomes and meet quality standards while containing overall health care costs.

About MHC ACO:

The MHC ACO is a collaborative effort among three leaders in the delivery of quality healthcare in the Tri-State region. The health care professionals and staff of the three organizations work together to provide coordinated quality care. To learn more, [visit mhcaco.org](http://mhcaco.org).

Marshall Health is the faculty practice plan of the Marshall University Joan C. Edwards School of Medicine, making it the region's only academic health system. With more than 250 providers practicing in 65 areas of primary and advanced care and 25 outpatient clinic locations, Marshall Health is also the largest, most comprehensive provider in the Tri-State region. To learn more, visit marshallhealth.org.

HIMG is a thriving multi-specialty group practice founded in 1969 and now consists of more than 60 physicians, physician assistants and nurse practitioners including primary care, urgent care, and medical and surgical subspecialties. The physician group is considered to be a premier group practice in the Tri-State area with a proven track record of attracting high-caliber, qualified physicians. The HIMG Regional Medical Center is located at 5170 U.S. Route 60 East, Huntington, WV, 25705. For more information, please visit uhswv.com.

Cabell Huntington Hospital is a not-for-profit, regional referral center with 303 staffed beds. Located in Huntington, WV, Cabell Huntington Hospital is home to the Hoops Family Children's Hospital and the Edwards Comprehensive Cancer Center and cares for patients from more than 26 counties throughout West Virginia, eastern Kentucky and southern Ohio. Opened in 1956, it is a teaching hospital affiliated with Marshall University Schools of Medicine, Nursing and Pharmacy. To access more information, visit cabellhuntington.org.

Cabell Huntington Hospital Doctors' Day

Hoyt J. Burdick, MD,

On ~~XXXXXXXX~~, 2018, CHH celebrated all of the physicians who provide excellent care to the people of our region during National Doctors' Day.

"Cabell Huntington Hospital has always enjoyed the support of community physicians who, in 1945, sent 10,000 post cards in support of the legislation and bond issue to establish the

hospital," said Hoyt J. Burdick, MD, senior vice president and Chief Medical Officer. "From the first patient in 1956 through today, the dedication, skills and diversity of the CHH Medical and Dental Staff provide its strongest competitive advantage. The outstanding physicians we celebrate today are advancing regional healthcare and turning Huntington into a medical destination through their commitment and excellence."
